

# Symantec™ Messaging Gateway Small Business Edition

Affordable, easy to use email security appliance for the Small and Medium Businesses

---

## Overview

Symantec™ Messaging Gateway Small Business Edition is an easy to use email security appliance that delivers effective and accurate antispam and antivirus protection, advanced content filtering, data loss prevention and email encryption. It catches more than 99 percent of spam with less than one in a million false positives. With no per user fees and available as a VMware-based virtual appliance, Messaging Gateway Small Business Edition can be implemented on your existing hardware, making it one of the most affordable gateway appliance solution available.

---

## New Features

- Improved targeted antispam effectiveness with granular new dispositions for Newsletters, Marketing Mail, and Suspicious URLs. IT administrators will now be able to configure policies by group with distinct actions.
- Enhanced Data Loss Prevention and encryption integration. Customers can now add on a PGP Universal™ Email Gateway deployment and Symantec™ Data Loss Prevention Network Prevent Email.
- Seamless integration with Symantec™ Protection Center, Symantec's single sign-on management console for security products. Customers can now have unified management of more than one deployment of Messaging Gateway and do reporting across their security portfolio.

## Key Benefits

### *Uncompromising protection*

- 24 hours a day, 7 days a week real-time protection provided by Symantec's Global Intelligence Network - over 120 million antivirus sensors, 40,000 firewall and intrusion detection sensors, and over 5 million Probe Network decoy accounts, across 70 countries.
- Unique antispam solution adapts to your local threat conditions; catches more than 99% of spam with less than one in a million false positives
- Advanced content filtering technology scans both inbound and outbound message flow to protect confidential information.

### *Simple and easy-to-use management*

- Installation can be completed within 15 minutes, with no requirements for tuning allow listing or block listing.
- Easy to use web-based interface, informative reporting, end user quarantine, and detailed message tracking makes administration effortless.

### *Affordable*

- Virtual appliance option help save on hardware costs.
- Scalable solution so you are well positioned to grow.

**Dashboard and Spam Quarantine Illustration**

**Management and Reporting**

Easy-to-use web-based interface enables the administrator to quickly manage and control threats with easy to manage policies. Intuitive dashboard provides real time status and summary reports on all Inbound and Outbound traffic.

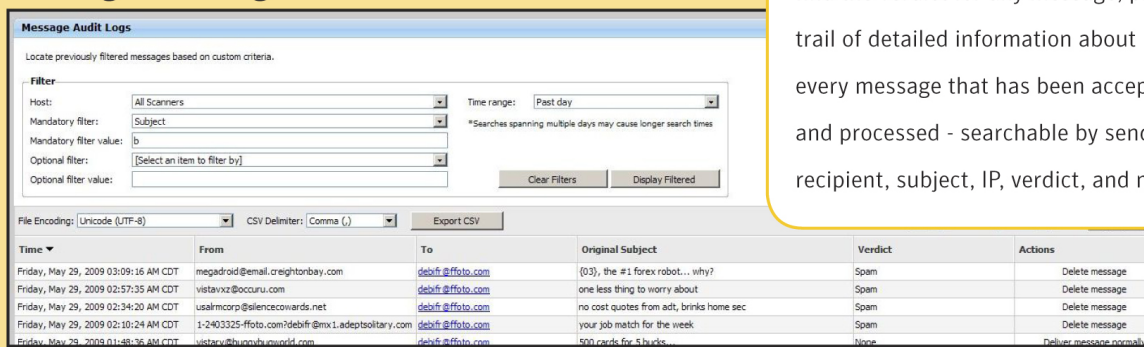

**Spam Quarantine**

End-user self service spam quarantine leverages LDAP to authenticate end-user login. A periodic email summary can be sent to users, listing the newly quarantined spam messages, and including links for users to immediately release messages to their inbox or log in to their personal quarantines.

Easy to use, time-saving tool enables the administrator to quickly and accurately find the verdict for any message, provides trail of detailed information about every message that has been accepted and processed - searchable by sender, recipient, subject, IP, verdict, and more.

**Message Tracking**

Data Sheet: Messaging Security  
Symantec™ Messaging Gateway Small Business Edition

<b>Antispam</b>	
Effectiveness	> 99%, using over 20 layers of protection
Accuracy	< 1 in 1 million false positives
Spam Quarantine	End-user self-service quarantine
Adaptive Reputation Management	Accurately stops up to 90% of incoming spam at the connection level; leverages both global and self-learned local reputation to intelligently manage email flow, providing open connection and mail flow to good senders while placing rate limits on suspicious senders
Extended Protection	Image spam, PDF spam, zombie attacks, BATV backscatter, phishing, directory harvest attack, denial of service, SPF, sender ID
Customizable Options	End-user self-service allow and block lists; language filters
Inbound and Outbound Protection	Protects sender reputation by stopping outbound spam from botnet infected machines
<b>Antivirus</b>	
Signature-Based	Stops viruses, worms, Trojan horses, spyware, adware, bots, and rootkits
Proactive Non-Signature-Based	Day zero protection against outbreaks and unseen threats, including mutating malware
Inbound/Outbound Protection	Antivirus protection for both inbound and outbound messages
<b>Content Filtering/Encryption</b>	
Attachment Filtering	True file type attachment filtering; detects content inside compressed files
Message Annotations	Append custom text to email and IM for policies such as legal disclaimers
Dictionaries and Patterns	Policy-based inbound and outbound filtering of offensive language, credit card and social security numbers
Inbound/Outbound Protection	Not only protect sensitive information from leaving, but also prevent emails against policy from entering; Add-on option for Symantec Data Loss Prevention Network Prevent
Email Content Encryption	Add-on hosted encryption service that allows customers to encrypt sensitive outbound email without managing any additional infrastructure; Add-on option for PGP Universal Email Gateway
<b>Setup and Management</b>	
Setup	Setup in minutes, with no tuning requirements; appliance automatically adjusts to local threat environment
Mgmt Console	Web interface with role-based administrative and end-user self-service access
Active Directory / LDAP Integration	Group-driven policies simplify management
Reporting	Customizable and schedulable reporting can be automatically emailed
Message Tracking	Provides administrator with a trail of detailed information about every message that has been scanned
Other Mgmt Features	Integration with Symantec Protection Center
<b>Growth Ready</b>	
User Count Growth	Same hardware can be used for over 250 users
Spam Traffic Growth	Scales to manage 300% traffic growth
