

See it all with VANTAGE

- Want to know if employees are misusing your Internet resources?
- Want to know when your security measures are not working properly?
- Want to know how to improve the performance of your network?

WebSpy Vantage is an award winning analysis and reporting software solution that provides an interactive reporting interface into all areas of Internet, email and network usage within an organization.

The comprehensive information provided by Vantage can assist in maximizing employee productivity through the encouragement of responsible usage of system resources. Vantage can also help administrators monitor security risks, and identify and resolve network problems.

Powerful Adhoc Drilldown Capabilities

In short, Vantage empowers you to *see it all* with intuitive high-level analysis and powerful drill down capabilities that enable you to identify the root of the problem.

Maximize Employee Productivity

- Identify misuse by monitoring which sites are being viewed, for how long, what is being downloaded, and by whom.
- Ensure compliance with Internet acceptable usage policies by checking time limits on recreational browsing, as well as confirming that restricted content is not being accessed by certain individuals or departments.
- Monitor email and instant messaging activity to protect the transmission of confidential information and control non-work related communication.

Strengthen Security Controls

- Verify the configuration of the network's firewall and its control of network traffic.
- Identify and investigate security breaches.
- Determine the source of email viruses and investigate their organizational impact.

Improve Network Management

- Improve the management of network resources and diagnose network problems.
- Assess bandwidth usage and identify excessive downloading from particular websites, of specific files, and by which employee.
- Examine logon activity and unauthorized file access.

Report on Website Statistics

- View reliable statistics of your organization's own website including, but not limited to; number of visits, pages viewed, time spent per visit, and referring websites.
- Publish valuable reports on website statistics and use these to improve the website's design and functionality.

Minimum Requirements

- Microsoft® Windows® 2000, XP, Server 2003 or Vista
- Microsoft® .NET Framework 2.0

Recommended Requirements

- 2 GHz CPU or faster
- 1 GB RAM
- Microsoft® Word Viewer 2003 (free download) to run Microsoft® Word reports
- Microsoft® Internet Explorer 6.0 or higher to view HTML (MHT) reports
- Microsoft® MDAC 2.8 or higher (to import from an SQL database)
- An Internet connection capable of accessing XML web services (to receive automatic updates)

Key Features - VANTAGE

- **Import** text or SQL log data from a wide variety of 3rd party vendor products, or Windows Event logs, directly from servers or workstations on your network. For a list of supported log formats visit: <http://www.webspy.com/resources/logformats.aspx>
- **Interactively drilldown** into any area of log data to interrogate specific events.
- Generate a wide variety of default reports and create your own custom report templates. **Reports** can be generated in HTML, Microsoft® Word, CSV and Text formats.
- Represent raw log data more meaningfully using **Aliases**. For example, transform logged data into real user names, and group them into departments. Group IP addresses into subnets, or long user-agent strings into browsers and other applications.
- Categorize web site URLs, email subject lines, instant message chats and any other logged data using customizable **Keyword Profiling** technology.
- **Schedule** any action, such as Importing and Reporting, to occur at convenient times such as overnight or on weekends.
- Import users, departments, locations and any other **organizational unit from data in LDAP, LDIF, or CSV** and conveniently use imported organizational structure in reports, filters, and ad-hoc analysis.
- Vantage now use **multithreading techniques** to utilizes the extra processing power on machines with multiple cores or CPUs to import log files and generate reports 30-50% faster.

VANTAGE ULTIMATE

Vantage Ultimate is WebSpy latest innovative solution that incorporates all innovative Vantage features as well as being able to satisfy the surging organizational need of **distributing information - securely and responsibly**.

Vantage Ultimate ascertains a company's organizational structure and provides secure web-based access to potentially sensitive reports to any, or all, members in an organization.

Securely Distribute Information & Responsibility

- Securely distribute sensitive reports to managers via a web interface, showing the activity of their direct subordinates.
- Share the responsibility of enforcing acceptable usage across your organization.

Drive Responsible Behavior

- Enable employees to conduct their own ad-hoc analyses to view their productive and non-productive activity.
- Employees who understand the organizational costs of their personal unproductive activities are more likely to modify their own behavior.

Provide Full Disclosure & Increase Acceptance

- Provide employees with full disclosure regarding the information recorded about them.

Self Serve, On-Demand Investigation

- Distribute original data storages to any of your employees, enabling them to conduct their own ad-hoc investigations. For example, distribute storages to security managers enabling them to investigate the activity of a specific employee with access to confidential and sensitive information.
